PROFESSIONAL SUMMARY

Computer engineering graduate (ESPRIT, 2025) with Full Stack experience gained in banking (Al Baraka Bank), at VERMEG and through freelance projects. Specialized in Java Spring Boot and Angular, I design and deliver complete web applications, from backend to user interface. Comfortable with REST APIs, PostgreSQL, Docker and CI/CD pipelines. Rigorous, self-driven and quality-focused.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, Node.js, Express.js, Django, REST APIs
Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3
Databases: PostgreSQL, MySQL, MongoDB
DevOps and tools: Git, GitLab, Docker, Jenkins, CI/CD, SonarQube, Grafana, Prometheus, Power BI
Testing: Postman, JUnit, Mockito, Jira
Methods and other: Agile Scrum, MVC, multi-tenant architecture, Machine Learning (basics)

PROFESSIONAL EXPERIENCE

Full Stack Developer – Final-Year Internship (PFE)
Al Baraka Bank Tunisia, Tunis, Tunisia | February 2025 – August 2025
Technologies: Spring Boot, Angular, PostgreSQL, Power BI, Machine Learning
- Designed and developed a banking application for ATM fleet management used by branches, the Electronic Banking Division and audit/control teams.
- Built the ATM registry, cash loading/unloading logs and tracking of cash surpluses, deficits and reconciliations.
- Implemented an automated alert and reminder system for ATM cash replenishment and incident management.
- Built a predictive Machine Learning model to optimize cash management planning and Power BI dashboards.

Full Stack Developer – Internship
VERMEG, Tunis, Tunisia | July 2024 – September 2024
Technologies: Spring Boot, Angular, Spring Security, Git
- Developed SnagSolving, a collaborative Q&A platform for developers: question posting, voting, real-time discussions, tag-based filtering.
- Managed access control and security with Spring Security in an Agile/Scrum environment.

Mobile Developer – Internship
OrgaExpert, Tours, France | June 2023 – August 2023
Technologies: Java, Android Studio, Git
- Developed a mobile application for daycare (crèche) management, used to streamline daily operations for staff and administrators.

FREELANCE EXPERIENCE

Freelance Full Stack Developer – HR Management System
Freelance project, private client | 2025
Technologies: Django, Angular, PostgreSQL
- Designed a complete HR system covering attendance and payroll: clock-in/out tracking, lateness and absence detection, automated payroll calculation.
- Built HR dashboards (attendance, leave, payroll) and delivered full stack development independently: PostgreSQL database, Django REST API, Angular interface, deployment.

EDUCATION

National Engineering Degree in Computer Science
ESPRIT – École Supérieure Privée d'Ingénierie et de Technologies | 2020 – 2025

Baccalaureate in Technical Sciences
Lycée Abou Kacem Echabbi, Mahdia | 2020

ACADEMIC PROJECTS

MetaMatch (Angular, Express.js, MongoDB)
- Sports management platform: performance tracking and task management. Personalized training plans.

Smart Educational Platform (Django, Angular, PostgreSQL)
- AI-powered learning platform: teacher recommendations by subject, automatic quiz generation from course PDFs and personalized notifications.

CI/CD Pipeline (DevOps) (Spring Boot, Jenkins, Docker)
- CI/CD pipelines with automated JUnit/Mockito tests and SonarQube code analysis. Monitoring with Grafana and Prometheus.
